Sound That Will Move You.

MINI D MONO SUBWOOFER AMPLIFIERS ENTERPRISE CLASS PERFORMANCE AT ENTRY LEVEL PRICE

Smaller - Stronger - Smarter

MiniD is a true next-gen amplifier - with features and a level of design sophistication years beyond the competition. With MiniD, Earthquake once again reasserts absolute dominance in the field of car amplifier technology.

Unprecedented placement possibilities

Reclaim your trunk space! The new micro form-factor of the MiniD opens up a new realm of placement possibilities - Under car seats, inside door or chassis panels. It is no longer necessary to stuff your trunk with amplifiers to get great sound.

Real world benefits

The real world benefits of these technologies are significant. In comparison to a traditional Class AB amplifier with an efficiency of 45 percent, the MiniD at 96 percent will use less than half the power playing at the same volume. Or it will play 3 db louder with the same amount of power. 3 DB is the same as adding an extra woofer to the system.

With MiniD even a staunch system will be able to operate with just the stock battery and alternator. As MiniD is very competitively priced against inferior rivals - all this extra power is basically FREE.

First ever OMEGA controlled amplifier!

First ever VE-TAT accelerated amplifier!

First ever MARS protected car amplifier!

Features

- **Clip Suppression technology** -the MiniD will avoid hard clipping , so in the event of excessive input the sound will not get harsh.
- **Bridge-Link feature** - two MiniD amplifiers (of same model) can be linked together for Triple the output of a single unit.
- **Fan free operation** - the stellar efficiency of the MiniD negates the need for noisy fans. Even when driven continuously 2 db into clip the MiniD will not overheat.

	Mini D1000	Mini D2000	Mini D2500
Class / Output	Class "D" / Mono	Class "D" / Mono	Class "D" / Mono
Maximum Peak Power	1000 watts	2000 watts	2500 watts
1-Ohm RMS Power	600 watts	1200 watts	2000 watts
2-Ohm RMS Power	360 watts	1000 watts	1800 watts
