

Tigris

Titan Tower Series

TIGRIS

(H) Height	1302mm
(W) Width	275mm
(D) Depth	487mm

Model:
Titan Tigris

OBJECTIVE

Earthquake Sound is proud to present the new Tigris tower speakers, the big brothers of the Telesto towers. Each tower features one 1" silk dome NEO tweeter, one 2" ball loaded silk dome tweeter, dual 8" Kevlar long excursion midbass woofers, all enclosed in an egg-shaped speaker enclosure to enable the most transparent sound reproduction with minimal reflections. Though they share the Telestos' sleek style, they are more powerful and bigger in size.

Available in black piano lacquer finish, the Tigris brings elegance to your home theater system without compromising the quality of sound performance.

INTENDED USE

- ✓ Contractors, Custom Installers & Retailers
- ✓ Home Theater & 2-Channel Music Systems
- ✓ Recording Studio
